

Volume private course

www.lashes4girls.nl

Volume extensions is an accredited lash course which gives hopeful lash technicians all of the skills and techniques they need to perform Volume lashes on their clients.

All volume students will need to be competent in performing Classic eyelash (1-1) application and have at least 3 months experience as a qualified Classic eyelash technician.

Students can develop their existing eyelash extension skills by learning the techniques of volume application. The volume eyelash method is where multiple synthetic eyelash extensions are placed onto one natural lash, giving your client's eyelashes volume and length.

This course is a full day of hands-on practical training, demonstrations, consultations and theory-based learning for our students! We focus on providing our students training which covers both the understanding of techniques and the theory of volume lash application at length.

Our courses run through the Volume eyelash treatment from end-to-end, and even support students with ideas on developing their lash businesses. All students will complete the training by applying eyelash extensions to a mannequin head before performing Volume treatments on live models to ensure safe techniques.

Before the treatment:

- Client consultations: understanding your clients wants, including style guides and case studies.
- Health and safety: recognising contra-indications and contra-actions in the natural lash, plus general health and safety guidance, including allergy tests.
- Volume vs. Classic: what are the differences between Volume Lashes and Classic lashes, and how does this impact application.

Application and Technique:

- Volume technique: the bulk of the training will be practising 1-1 lash application and volume fan application, applying multiple extensions to the natural lash.

- How to boss lash retention: tips on adhesive storage, application and a range of factors which impact the retention of extensions.
- Handmade fan training: practising the skills needed to create the perfect volume fans.
- Lash extension mapping: learning different lash map styles and guidance for different eye shapes.

Aftercare, Client support and Business tips:

- Lash maintenance and aftercare: tips on how to encourage long-lasting eyelash extensions for your clients, including aftercare tips and why a client may have poor retention.
- Pricing advice: how do you price eyelash treatments now that you have premium training?
- Business ideas: social media tips, recommended products and how to ensure your lash business thrives!

Volume lashes are an ever-growing, high demand treatment amongst clients and display your lash extension expertise.

Training in the Volume Lash technique enables you to offer a range of extension treatments for your clients, including popular hybrid styles.
